

XIX Petrol Station 2012 International Fair

"Petrol Station 2012 International Fair: Technology, Fuel, Ecology, Energy, Carwash" is a real showcase of exhibitors and the organizer - Polish Chamber of Liquid Fuels.

XIX International Fair "Petrol Station 2012" will be held from **23rd to 25th May 2012** in the Congress and Fair Centre MT Poland, Marsa Street 56c, in Warsaw.

The new venue gives our exhibitors new opportunities to present their offers. In 2012, exhibitors will have an access to the exhibition hall and a much larger area of open space.

Within the first two weeks after the official launch of our offer, over 60 companies have already booked exhibition space e.g.: **Ehrle, Corrimex, Euro-Ekol, BKF, ANWIM, Karcher, BP, SULTOF, Nilfisk-Advance Service Center Orlen, Sosnowski, Transportation Technical Supervision.**

We also invite companies offering the equipment for shops, bars, car washes, modernizing fuel stations services as well as security companies.

Furthermore we invite you to participate in the **"Product of the Year" competition**. This prestigious competition organized every year aims to identify the most popular and the best products / services on the market manufactured by the exhibitors.

Let's take the next edition of **"Petrol Station 2012"** as a platform to gain unique knowledge about the market and the competition, to exchange experiences and contacts. During 2012 we are planning to organize more attractions for our guests like seminars, workshops and thematic meetings, presentations and conferences. We also offer free education and trainings for owners of service stations. On the second day of the Fair we are planning to organize a meeting for exhibitors and visitors - a banquet honoring the winners of innovative products and services.
