

4th Carbon Capture & Storage Summit 2012

The 2012 event will once again provide the perfect platform for the global CCS industry to meet during two days of formal conference sessions, excellent networking opportunities and interactive panel and round table discussions.

Key Topics

- Global CCS project development
- Supporting the implementation of EU CCS policy
- CCS project funding & financing
- Infrastructure development for CCS deployment
- Creating the optimal storage strategy
- Achieving maximum plant efficiency through optimised integration of CO2 capture process
- Health, safety, environment & public acceptance
- Long-term CO2 storage liability
- CO2 utilisation potential
- European CCS project updates: the power sector
- Value chain optimisation
- European CCS project updates: energy intensive industries
- Cost of low-carbon electricity: CCS vs. alternatives
- Growth of the natural gas industry: implications for CCS

Venue

4th Carbon Capture & Storage Summit 2012

May 16, 2012 - May 17, 2012

Düsseldorf, Germany
