

5th annual Bulk Liquid Storage

Improving Efficiency of Terminal Operations with Cost Efficient Methodologies

5th Annual Bulk Liquid Storage conference from marcus evans helps the industry to implement efficient tank maintenance procedures, extend lifespan of tanks, latest technologies in tank cleaning, efficient HSE standards and many more.

Do not miss this opportunity to network with our speakers and fellow industry peers to gain further insights on the topics which are crucial to safeguard your tanks and to stay competitive

Key topics:

- Reviewing new API codes and standards and identifying the new updates for terminal operations
- Extending the life cycle of aging tanks and ensuring it's reliability in the long run
- Optimising your terminal operational efficiency through higher utilisation
- Mitigating, controlling and preventing corrosion with proven technologies specific for your tanks
- Grasping the latest technologies from alternative fuels storage to tank repair and software

Venue

InterContinental

September 3, 2013 - September 5, 2013

Kuala Lumpur, Malaysia
