

Bioenergy and Biomass Utilization Summit

2014 China International Bioenergy and Biomass Utilization Summit. Theme: Bioenergy: the next energy star.

Based on BBS 2013's successfully closed on April 24th, 2013, BBS 2014 will be held in Shanghai. This summit is expected to bring about 600 elite from more than 20 countries. It is organized by World Bioenergy Association and will be the most influential bioenergy summit in China.

The summit provides an unparalleled marketing opportunities in a dynamic B2B environment. BBS 2014 has 4 sub-forums which will cover almost all areas of bioenergy. These four sub-forums are including:

- **Solid Fuel** (Harvesting, Storage and Mobilization for Biomass Feedstock; Testing and Certification; Advanced Molding Technologies and Equipment; Advanced Combustion Technologies and Equipment);
- **Advanced Biofuels and Bio-based Chemicals** (Non-food Biomass Feedstock Cultivation Technologies; Advanced Biofuel Conversion Technologies and Catalyst; Bio-based Chemicals Production Technologies and Poly-generation; Aviation Biofuel and Transportation Biofuel);
- **Biogas** (Feedstock Harvesting and Pretreatment Technologies; Large-scale Biogas Plant Technologies and Equipment; Large-scale Biogas Plant After-treatment Technologies and Equipment; Biogas Power Generation, Landfill Gas to Electricity, Tri-Generation and High-power Biogas Generator);
- **Biopower** (Biomass Feedstock Harvesting, Storage and Mobilization Model and low-cost Biopower Generation; CHP and CFB Boiler; Garbage Power Generation; Biomass Gasification Power Generation Technology)

Venue

Bioenergy and Biomass Utilization Summit

April 23, 2014 - April 24, 2014

Shanghai, China
