

AS 24 counts on the latest generation of Hectronic's fuel terminal HecVision

As part of the Total group AS 24 is a leading European company in the area of fuel distribution and service offers for transportation companies. AS 24 has been counting on the proven technology from Hectronic for many years. For the planned substitution of fuel terminals this innovative technology could assert itself and Hectronic has won the contract for this project. Thus, the course for the future is set and Hectronic will step by step equip the Europe-wide petrol station network with fuel terminals of the latest generation. With the new HecVision AS 24 will utilize the fourth generation of terminals from Hectronic.

"Since AS 24 has been our partner for many years we are particularly proud and happy that our innovative technology has convinced our customer and that we could assert ourselves in the tender for this project." - Eva Richir, Key Account Manager and Robert Mazuga, Director Sales International Hectronic GmbH

With a petrol station network of more than 850 stations in almost 30 European countries AS 24 is a pioneer when it comes to innovative and user-friendly solutions for forwarding companies. The fuel terminals of the extensive petrol station network will be substituted in the following years in order to further guarantee the high technological standard. The fuel terminals HecFleet 44 currently in use will gradually be replaced by the new generation of terminals. The new fuel terminal HecVision is equipped with state-of-the-art hardware and software technology. The PCI-compliant 10" touchscreen allows for sophisticated and user-friendly operator guidance. The handling of the authorization process at the fuel pump will be reliable and user-friendly, offering numerous authorization options and therefore a new level of convenience. Due to PCI-compliance a high degree of security with respect to data protection is guaranteed. The real-time processing of the data and high authorization speed are made possible by the new software technology.
