## Best-in-Class - Best Practices SAP Oil & Gas Downstream Solutions powered by Implico

### We optimize your secondary distribution processes

Oil & Gas companies all over the world are looking to improve in three essential areas:

- Become more agile
- Boost quality
- Cut costs

And your company is probably no exception! We have the expertise. And we can use it to help you. The Implico Group offers its consulting services and software solutions targeting process optimization to companies of any size and anywhere in the world. The Oil & Gas downstream industry is the key area of expertise. We combine our many years of experience gained in countless projects in the downstream industry with the very latest IT and ERP/SAP expertise, plus our high-performance (SAP) solutions.

Five of the ten biggest oil companies in the world rely on Implico's industry experience, consulting expertise and standardized software products, including SAP® OGSD, IDM, CPR and OpenTAS®.

You, too, can benefit from this unique combination. It enables you to optimize your complete process chain, from order acceptance and requirements planning through tour optimization and telematics and on to billing and reporting.

### **We offer you:**

- Competent advice
- Well designed, integrated business models
- Expert knowledge in the areas of commerce and logistics
- Reliable project management
- Intelligent system support
- Integrated all-in-one SAP solutions
- Maximum use of automation
- Optimized, highly efficient processes

The aim is clear: the goods must be transported reliably, punctually and as quickly as possible to the customer with the minimum expense. Implico offers you the exact SAP functionality that you need to optimally deliver to your customers.

We find the solutions that make you more agile and better while cutting your costs.
