

## All change in Hall 10.0 at Automechanika 2014

**Following the development of UNITI expo (3-5 June, Stuttgart, Germany), an official statement has now been released by the organisers of Automechanika, that Hall 10.0, which for many years was used for exhibits from the retail petroleum equipment sector, will now house a completely new feature, under the branding 'Tomorrow's Mobility'.**

With a new generation of battery, fuel cell and hybrid technologies on show, this new initiative they say will focus on the next generation of mobility solutions. Discounted tickets for advance bookings are now available for their 2014 event, being staged in Frankfurt from 16-20 September.
