

## OPW Releases New CNG Type 2 Fueling System

**OPW, a Dover Company and the global leader in fluid-handling solutions, is proud to announce the release of its new CNG Type 2 Fueling System.**

The OPW CNG Type 2 Fueling System incorporates OPW's Type 2 Nozzle with a 3-Way Valve for time-fill or fast-fill service in commercial and industrial CNG fueling applications. The OPW CNG Type 2 Fueling System represents the latest innovation in industrial and commercial fueling and has been specifically designed to bridge the gap between convenience and comfort, without sacrificing the safety, efficiency, reliability or environmental sustainability that you have come to expect from OPW.

Specifically engineered with fewer potential leak points than other fueling systems, OPW's CNG Type 2 Fueling System features an innovative user-friendly push-on/pull-off operation and offers flexible extension options to meet virtually any fueling application. Additional key features of the OPW CNG Type 2 Fueling System include:

- **Ergonomic Grip** – provides maximum user comfort and control
- **Duratuff® Shell Construction** – protects the 3-Way Valve and stainless-steel tubing for added safety and longevity of the equipment
- **Inlet Tubing Offset** – designed to eliminate mis-connections on OPW CNG Hose Kits
- **TUV & CSA Approved OPW Type 2 CC600 Series Nozzles** – compatible with NGV1 profile receptacles and features an internal 200 micron filter to capture gas-borne debris commonly found in CNG fueling systems
- **CSA Approved Swagelok® G83 3-Way Valve**
- **Easy Installation** – shipped fully assembled, tested and ready for installation
