

## EC - European Commission

The European Commission is the executive of the European Union and promotes its general interest.

A European energy union will ensure that Europe has secure, affordable and climate-friendly energy. Wiser energy use while fighting climate change is both a spur for new jobs and growth and an investment in Europe's future. The EU's energy union strategy is made up of five closely related and mutually reinforcing dimensions:

- Security, solidarity and trust
- A fully-integrated internal energy market
- Energy efficiency
- Climate action - decarbonising the economy
- Research, innovation and competitiveness
