

## DVFG - German LPG Association (Deutsche Verband Flüssiggas)

The German LPG Association (Deutscher Verband Flüssiggas e.V.) supports the liquefied gas industry in Germany. As a trade association, it plays an important role in the design of standards and guidelines and offers solutions for the modern and efficient use of energy sources. The contribution that LPG can make in regards to the current energy, transport and environmental challenges is particular important. The member companies of the DVFG share their know-how, especially regarding the safe usage of LPG: technically, operationally and legally. The knowledge transfer coordinated by the association is a significant contribution to the future of the energy carrier LPG in the energy market.
