

GripHero Ltd

GripHero is an award-winning hand-protection system that is eco-friendly and a highly-efficient way to transform customer health & safety on your forecourt

The multi-award-winning GripHero is protecting drivers with best-practice ATEX certified anti-static hand-protection, all while reducing your forecourt's hand-protection footprint...

- 55% less plastic consumption *
- 70% less plastic footprint **
- 75% less carbon footprint **

* Efficiency data representative of over 1,000 UK and international forecourts.

** UK Government figures used to calculate footprints.

Internationally regarded as the best-practice solution to customer protection, static safety and environmental efficiency - GripHero is endorsed by Health, Safety and Sustainability departments across the world.

Having already won multiple awards in the forecourt industry, GripHero has been adopted by networks around the globe - with applications in the forecourt retail industry, emergency services, security services, transport and haulage.

To protect your customers, staff and facility against the hygiene and static issues surrounding the forecourt industry, GripHero offers the ultimate in ATEX-approved hand-protection, dispensed right at the point of fuel delivery. This is the most convenient location possible for the customer and a big win for health and safety.

If you also want to stop your plastic glove waste and litter problem, GripHero offers the most environmentally friendly and efficient solution for you - proven in the field to dramatically reduce unnecessary waste and litter - another big win for sustainability.
