

Klostermann Group

The Klostermann main factory is in the West of Germany. We have support bases all over Germany and a subsidiary in the Netherlands. With 200 employees and a consolidated average turnover of more than € 30 mio we belong to the big signmaking companies.

We cover the whole range of outdoor and indoor signage, orientation systems and all related services from site survey, installation until maintenance. With our very experienced projectmanagement we have rebranded 600 petrol stations within a time budget of 3 months and within financial budgets.

Our customers are mineral oil companies, railway companies and companies with a dealer network like automotive, supermarket chains, banks, car rentals and more.

With international cooperations we can cover almost every European country.
