

## Transaction Network Services

### About TNS

TNS is a global leader in providing full-stack, modern and secure payment and network solutions. As a leading provider of Infrastructure-as-a-Service (IaaS) solutions with more than 30 years' experience, TNS has been offering managed service solutions to more than 1,400 organizations in over 50 countries. TNS' comprehensive portfolio spans from cutting-edge payment terminals and online solutions to secure global network connectivity and seamless payment processing.

With TNS' portfolio of industry leading services, customers can reduce the complexities of fragmented payments and connectivity with just one trusted managed service partner.

### Trusted by Leading Organizations

From enterprise retailers, fuel and convenience stations, POS and ATM device deployers, through to acquirers, financial institutions and payment processors, TNS' customers rely on secure and dependable solutions to accept, connect and manage their payments and network infrastructure environments, enabling them to focus on their core business operations. (note: this is a long sentence)

### The Complete Commerce Solution

TNS offers a complete commerce solution, eliminating the complexity with a single partner for payments and connectivity solutions, providing organizations with the complete reliability, confidence and security that customers expect.

Complete commerce is full-stack payment and network capability delivered as a managed service, allowing businesses to:

- Accept payments: Allow customers to choose their preferred way to pay, online or in-person with TNS' range of POS terminals - unattended, at the pump or in-store.
- Connect anytime: Securely connect payment devices, sites or cloud environments via its range of managed connectivity services to any destination with a secure PCI DSS certified and carrier-agnostic global network.
- Orchestrate transactions: Process and route any transaction, to any payment provider, globally, via its cloud-native payment platform.
